PREFACE.

As there is no branch of knowledge which combines so much useful information with so much delight as Geography it is presumed that this little Volume, which is designed to illustrate the form, structure & divisions of the earth, will be received as a highly valuable publication.

On this account The Geographical Annual may justly lay claim to the title of a Perennial rather than an Annual, & be valued as a lasting Gift of Friendship rather than as a Pastime offering; it will however be published every year for the purpose of including the Latest Discoveries & the Changes that are continually taking place in various quarters of the Globe.

The late successful expedition of the Two Landers for the discovery of the Niger, the political seperation of Belgium from Holland, the new boundary line to Greece, & other interesting & important particulars have been most carefully attended to & laid down in this work. A new & original map is also given of Great Britain, Ireland & Scotland, according to the constitution of 1832, it shews all the places which return Members to Parliament, the number of Members returned by each place, the Old & New Boroughs, & those places which were then disfranchised.

The Geographical Annual therefore now comes forth with increased claims to the Patronage of the Public & the Royal Sanction with which it has been honored, as well as to the high commendations of the Public Journals of the Kingdom which have almost unanimously pronounced this Publication to be not only of the greatest utility in itself, but of a character that will entitled to hold a permanent rank among the Fine & Useful Arts of the British Empire.
